

SCOTT COUNTY

Scott County is located in the western part of Illinois, with a population of 5,355 (2010 U.S. Census). Scott County is home to persons identifying themselves as White (98.6%), Black (0.2%), or Hispanic/Latino (0.8%). According to the U.S. Census, 10.4% of residents live at or below the federal poverty level (FPL), compared to the state rate of 13.3%.

Scott County was formed in 1839 out of Morgan County. It was named for a local pioneer family named Scott. The county seat is Winchester, a community of almost 1,700 people.

Children under the age of 5 years constitute approximately 6% of the population of Scott County. Early care and education in the county are provided by Head Start, Preschool for All (PFA), and child care settings (including licensed child care centers, licensed family child care homes, and license-exempt child care centers or homes). * Note that search results by county may show a county with funded enrollment but no sites. This is because all of the service in that county is home-based.

The Illinois Early Intervention Program (funded by IDHS) provides services in the home to children with disabilities, birth to age 3. Preschoolers with special needs (ages 3-5) may be served in PFA sites, Head Start programs, child care settings, early childhood special education classrooms, or the home.

IECAM Early Childhood Data: FY2010

Preschool for All
(3-4 year olds)

Number of sites:
1

Proposed capacity:
80

Head Start
(3-4 year olds)

Number of sites:

0

License-Exempt Child Care Centers
(birth-5)

Number of sites:
0

Total reported capacity:
0

Licensed Family Child Care Homes
(birth-5)

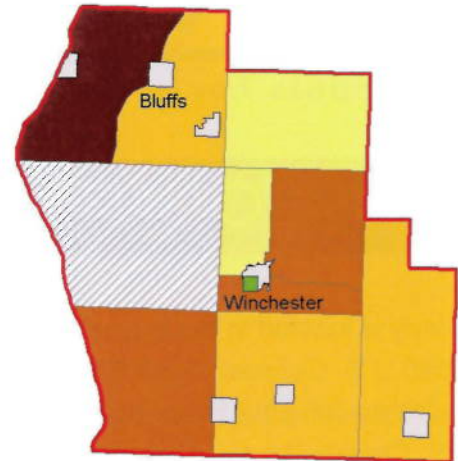

Number of sites:
16

Total licensed capacity:
128

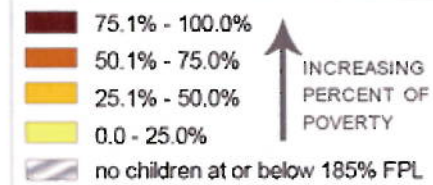

Publicly Funded Preschool in Scott County

According to population estimates reported on IECAM (2008 census estimates), **45%** of 3- and 4-year-old children in Scott County are living in families at or below 185% FPL (first PFA priority level).

The map (top right) shows the distribution of **publicly funded preschool** sites in Scott County (divided into townships). The color ramp (in the legend) indicates the percentage of 3- and 4-year-old children who live in households with an income at or below 185% FPL. Note that those townships in the darker shades of brown reveal a higher percentage of poverty. The map highlights the importance of locating PFA and Head Start sites in areas of highest need.

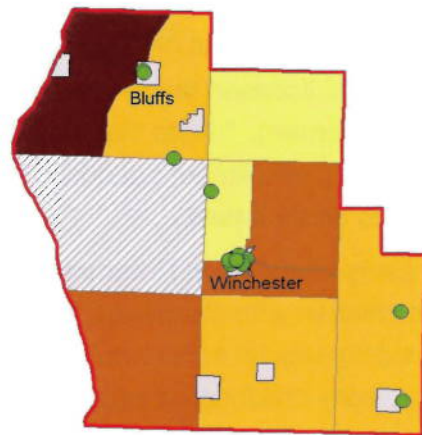

Percent of 3- and 4-year-old children living in families at or below 185% FPL

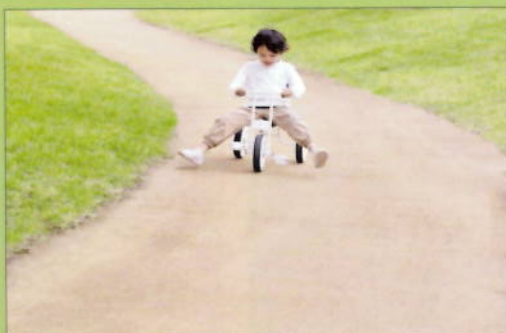

Child Care in Scott County

The map (bottom right) shows the distribution of **child care settings** superimposed on the county (divided into townships). Note that the green dots represent family child care homes. Many children from low-income families are cared for in family child care homes all over the county.
